

March 5, 2015

To the members of the Labor Committee:

Our economy isn't working for too many people, and it is even more difficult for women.

We support HB 6932 and HB 6784 because they allow workers to balance caring for their families and their jobs.

If we as American citizens value our democratic form of government, we need to be willing to provide economic and psychological support for the middle class and the working poor.

This affects our schools too since many poor parents send their sick children to school because they cannot afford to stay home with them....

It's time for the government to start working for the people again. For 50 years we've been undoing what FDR did for us and it's time to reverse that trend.

As a senior citizen, paid family leave means that, without concern about losing a day's pay, there can be a member of my family available to help me out should the need arises.

This is obviously important for workers, but it's also important for customers. Restaurants are an example that immediately comes to mind. I don't want workers there when they're sick.
